

Release Notes Software Build 1025 HotFix 1

Rottweil, November 2008

Important note:

This Release only applies to appliances with version 1025 – engine **1.1.314**.

Bugfixes:

FIXED on Appliance

- In some cases the partition table was corrupted after an appliance restore
- On Virtual Appliances the time synchronization did not work properly
- The 'ClearArchive' function of the appliance console did not work properly
- Some compatibility issues with signed mails were fixed
- The log files were not properly moved to the backup share if this feature was enabled.
- When restoring a Backup, the share settings were lost.

FIXED in Admin-GUI

- The Setup-Wizard did not work properly on appliances with build 1025

FIXED in Outlook-AddIn

- On starting the archiving two error messages were shown before the archiving process was running.

Notes for updating to Build 1025 HotFix 1

1. Requirements

In order to be able to upgrade your REDDOXX appliance to build 1025 version 1.1.316, the version 1.1.314 has to be installed on the appliance. Appliances with other engine versions cannot get this update because this is not necessary.

2. Request update

In the admin console at "Appliance Administration/Updates" you can request the update. After that, the updates are being downloaded to the appliance and are available for installation after a few moment. Note: By pressing F5 you can refresh the list. Should your appliance not be running on 1025 Final, this build will be transmitted likewise.

The updates have to be installed in the proper order. Should you be running a version that is older than build 1017 please contact REDDOXX support in order to receive the updates.

3. Install updates

In order to install an update, please select the respective update from the list shown at "Appliance Administration/Updates". By clicking the right mouse button you can install the update. After a successful update, the appliance needs to be rebooted.

4. Check valid software subscription

Since Build 1020 software updates can be requested only with valid subscription.
