

Release Notes Software Build 2027 Final

Rottweil, February 2011

Attention - Very Important – Please read carefully!

This update is a **major software upgrade** and requires **high attention** of the administrator. After the upgrade the access to the **MailDepot 1.0 is not available**. All mails have to be converted into MailDepot 2.0 before they can be used again within MailDepot 2.0.

Additionally we advise you to do this upgrade with the assistance of a **certified reseller**. Further you can get a brief introduction from our **podcast** and from the **instruction manual** in our download center.

In order to keep the fall out time of the **failover cluster** to a minimum, we recommend you to perform the upgrade together with a **Reddoxx Engineer**. For customers with a failover cluster license, this service will be provided free of charge. Please contact Reddoxx support to schedule an appointment.

And, first of all, please do a backup before you start!

Please note at all further information on the webpage **release announcement** in our support area. There you also will find the latest client software for download.

→ http://support.reddoxx.net/release_announcement.php.

New features:

- MailDepot 2.0. Administration with the new appliance manager (rdxadmin2.exe)
- Administration of CIFS and ISCSI devices with the storage manager.
- Improved Watchdog.
- OutlookAddIn now supports MS Office 2010 - 32-bit
- Virus scanner ClamAV update

Bug fixes:

- Update download via a proxy sometimes failed.

Notes for updating to Build 2027Final

1. Requirements

In order to be able to upgrade your REDDOXX appliance to build 2027 Final, version 1026 SP2 or higher has to be installed on the appliance.

2. Request update

In the admin console at "Appliance Administration/Updates" you can request the update. After that, the updates are being downloaded to the appliance and are available for installation after a few moments. Note: By pressing F5 you can refresh the list. Should your appliance not be running on 1026 Final, this build will be transmitted likewise.

The updates have to be installed in the proper order.

3. Install updates

In order to install an update, please select the respective update from the list shown at "Appliance Administration/Updates". By clicking the right mouse button you can install the update. After a successful update, the appliance may need to reboot.

4. Check valid software subscription

Software updates can be requested only with valid subscription.
