

Release Notes Software Build 2028

Rottweil, September 2011

The POP3 MailDepot Connector replaces the MSX-Agent.

Additionally to Microsoft Exchange 2003 / 2007 / 2010 it is also possible now to support other mail systems with similar journaling function.

Further information about **MailDepot Connectors** you will find in the manual for administrators version 2028 under <http://support.reddoxx.net/manual/index.php?b=2028&l=en&c=admin&s=5.5.7>

For archiving existing mails and mailboxes we have released the **Reddoxx Maildepot Importer**, so that Mails can be imported into the Reddoxx Archive-Containers. This new Software replaces the post archiving feature of existing mailboxes of the formerly MSX-Agent. Further information you can find from the corresponding manual under <http://support.reddoxx.net/manual/index.php?c=MDImporter&l=de&s=toc>

Attention!

In further versions the MSX-Agent will not exist inside the Reddoxx appliance anymore. Please migrate the MSX-Agent features to the Reddoxx MailDepot connectors!

New features:

- Support for REDDOXX MailDepot Importer
- SMTP MailDepot Connector
- POP3 MailDepot Connector
- MailDepot Directory Watcher
- Additional access control for MailDepot categories
- Archive process monitoring in diagnostic integrated.
- Virus filter now can block in archives (e.g. zip) embedded banned file extensions

Bugfixes:

- #246 : Some fixes in POP3 MailDepot connector for better handling of malformed e-mails.
- #211 : Fixed permission denied when mounting a CIFS share on a NAS device or a non DC file server.
- #212 : Access violation on preview or forwarding of decrypted/signed messages.

- #218 : On DNS server failure, the second DNS server was ignored in some cases.
- #228 : Setting the timezone on the appliance console was broken.
- #229 : German umlauts were not correct indexed after the watchdog has restarted the REDDOXX engine.
- #236 : Authentication failed in Cluster-Mode if the password contains a special character.
- #239 : Preview and forwarding of encrypted messages did not work with the WEB-Interface.

Notes for updating to Build 2028

1. Requirements

In order to be able to upgrade your REDDOXX appliance to build 2028, version 2027 HF2 or higher has to be installed on the appliance.

2. Request update

In the admin console at "Appliance Administration/Updates" you can request the update. After that, the updates are being downloaded to the appliance and are available for installation after a few moments. Note: By pressing F5 you can refresh the list. Should your appliance not be running on 2027 Final, this build will be transmitted likewise.

The updates have to be installed in the proper order.

3. Install updates

In order to install an update, please select the respective update from the list shown at "Appliance Administration/Updates". By clicking the right mouse button you can install the update. After a successful update, the appliance may need to reboot.

4. Check valid software subscription

Software updates can be requested only with valid subscription.
